RAREFIED HEIGHTS

I had called Pushpanjali as blue rose. Now the Pushpanjali Medicon 2024 has pushed that metaphor behind. I'm in search of words to describe what befall of Delhi. Only a nuclear bomb blast would have made a bigger news. The word grand fails to capture the academic feast by 48 superlative faculties.

A well chosen venue could handle the aspirations of 1500 doctors. There were many whose hearts were torn between the two Halls. A faculty lounge, an exhibition which show cased everything medical and gourmet food: something fit for a King. The mere scale was breathtaking. That it could be held itself was beyond imagination.

These are rarefied stratospheric events. My salutations to you Vinay sir. Long way to go for ordinary mortals like us to comprehend the mere scale of the event. You are an institution of management skills. We are contented with picking up pebbles aside the ocean that you are. May Bhagwan bless you, your family and Pushpanjali.

What an Event it was, such a mesmerising experience for everyone.

This was not a regular one day event, It included series of events such as Health walk.
